DETAILED ACTION

Double Patenting

Claims 1-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-39 of U.S. Patent No. 6714581. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are broader than the claims in the patent by reciting only “a plurality of electromagnetic gain media having apertures” instead of “each of said plurality of electromagnetic gain media having an aperture”.

A terminal disclaimer may be filed to overcome an obviousness type double patenting rejection. The terminal disclaimer is necessary in order to ensure common ownership of the reissue patents throughout the remainder of the unexpired term of the original patent.

Citation of Pertinent References

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
